

## Project 2 Write up

Team includes:  
Sneha Kumari,  
Jonas Thorrud,  
Dan McCabe and  
Dann Taylor

We are taking a look at Chicago's WalkScore and health code violations as found on <https://data.cityofchicago.org> and creating a layer map which showing WalkScore scores and restaurant Risk scores.

We are going to show a base layer of Chicago, a WalkScore layer and a restaurant score layer of most recent and last score.

We're using <https://community.algolia.com/places/> as the JS library we did not cover in class.

The walk score is collected and reported when we click on the map.
